## Air Freight

We aim to provide solutions that help you to connect markets. We operate regular air freight shipments from all major European, American and Asian airports. A distinct strength is our strong European footprint with daily direct and consolidated services from and to all major German airports. We maintain close partnerships with major airlines to guarantee freight space at competitive rates. Furthermore, we specialize in emergency logistics such as for time-critical air / NFO shipments ("next flight out") that require dedicated handling capacity and priority uplifts.

- ✓ Direct and in-direct services
- ✓ Daily consolidated and direct shipments from and to Germany / Europe and China / Asia
- ✓ Regular consolidation service from and to North America & Australia
- ✓ Import and export customs clearance with first and last mile delivery
- ✓ Track & Trace

## Express Courier

We have extensive experience in handling urgent worldwide overnight consignments ranging from automotive parts, medical supplies, AOG parts (aircraft on ground) and many other commodities. For instance, if you need us to pickup cargoes from Shenzhen by 4 PM today then we will be able to deliver throughout all European metropolitan areas by noontime of the next day. We enjoy access to the latest possible airport terminal cut-off times, own dedicated airport handling staff, guaranteed uplift space and priority customs clearance channels. There is simply no faster to way to ship.

- ✓ Economy service (consolidation)
- ✓ Premium service with next day arrival ("Next Flight Out" Service / Priority Uplift)
- ✓ Solutions for OBC (on-board courier), NFO (next flight out), AOG (aircraft on ground), Life Science, Diplomatic Mail, Automotive & many more industries
- ✓ Expedited import & export clearance
- ✓ 24/7 service desk & dedicated shipment monitoring

## Sea Freight

Sea freight forms the backbone of global supply chains. We therefore offer a wide range of sea freight services starting from classic FCL and LCL handling up to combined Sea & Air and trans-shipment solutions in order to achieve the best balance between costs and speed.

We operate our own NVOCC and maintain close carrier relationship to ensure sufficient space and competitive rates at any time.

- ✓ Full Container Load (FCL)
- ✓ Less than one Container Load (LCL)
- ✓ Stowage and tie-down of containers
- ✓ Import and export clearance
- ✓ Collection and delivery from / to all Chinese seaports
- ✓ Registered NVOCC

## Rail Freight

Rail freight is a competitive and environmental-friendly alternative considering its relatively faster transit time compared to sea freight and lower costs when compared to air freight. We offer regular departures on all major routings and are experienced in handling both full and less than one container loads.

- ✓ Competitive freight rates for FCL & LCL shipments
- ✓ Door to Door Solutions all across China and Europe
- ✓ Frequent weekly departures from/to all major terminals (e.g. Hamburg / Duisburg / Munich to/from Zhengzhou / Wuhan)
- ✓ Fast transit times (20-22 days from West to East and 14-21 days from East to West)

## Road Freight

In addition to domestic trucking services in China / Hong Kong, we are offering international road freight services at competitive rates from and to below mentioned regions. International trucking services are an increasingly popular, reliable and interesting alternative to rail freight due to its comparatively shorter transit time at a reasonable premium.

- (1) China from/to Southeast Asia: Vietnam, Thailand, Malaysia and Singapore  
(Estimated transit time between 2 and 8 days depending on origin & destination)
- (2) China from/to Europe: All countries of the European Union  
(Estimated transit time between 14 and 18 days depending on origin & destination)

- ✓ Regular scheduled FTL and LTL door to door trucking services
- ✓ Both domestic & international routes
- ✓ Extensive hub & spoke partner network across China, Southeast Asia and Europe
- ✓ Transit customs handling

## Warehousing & Distribution

Our strategically located branches in Hong Kong and Shenzhen provide about 10,000 ft<sup>2</sup> (ca. 1000 m<sup>2</sup>) of air-conditioned storage space and are monitored through a 24 hours CCTV system and additional security controls. The warehouse is partly equipped with rack systems and administered by a modern Warehouse Management System (WMS).

Domestic and cross-border distribution service is available through means of own dedicated trucks, courier services and our partner network.

- ✓ Air-conditioned storage
- ✓ Picking, labelling and packing
- ✓ Packaging and repackaging
- ✓ Display building & basic assembly
- ✓ Quality control
- ✓ Domestic & cross-border distribution
- ✓ Warehouse Management System (WMS)
- ✓ 24/7 security monitoring & guards

## Supply Chain Consulting

Our experts will assist you in asking and answering the right questions to improve your supply chain. We offer vast experience in all aspects of supply chain management no matter if you are looking to re-design your transport flow or if you aim to optimize your warehouse setup. We work with and for various industries and are more than happy to share best practice cases with you.

- ✓ Industry-specific solutions
- ✓ Supply chain analysis
- ✓ Cost assessment
- ✓ Information and goods flow analysis
- ✓ Supply chain design and implementation
- ✓ Transport optimization (e.g. routing, shipping modes)
- ✓ Warehouse optimization (e.g. design, stock levels and replenishment)
